

Sustainable development on Faculty of Science - Charles University in Prague Czech Republic

2011 - Initiative "Zelenáme" = Turning green

Based on experiences from WSES 2010 and WSES 2011

Goals

- Lower impacts of faculty on environment
- Better atmosphere for teachers and students
- Education in environmental themes
- Make students to take care of their faculty

How we do it?

Every student of faculty can design a project. The best projects are realized.

Better waste separation

Results: Lack of litter baskets proper for separation, people want to separate plastics and paper, 13 new separation baskets in on of faculty buildigs

Water from water tap

Results: stickers for propagation of water from water tap, 8 new water taps proper for filling reusable bottles

Two-sided print

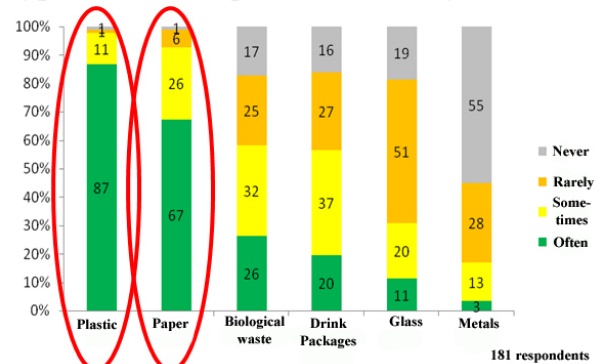

Results: manuals for two-sided print near every printing place

Better parking places for bikes

Results: 24 new parking places near faculty

Type of wastes separated on faculty of science
